

Watch Live as Massive Freezer is Built in Richland

By Joan Lucas. Published Friday, October 24th, 2014

RICHLAND, WA - If you've driven through Richland's Horn Rapids Industrial Park lately, you've probably seen a massive building going up. Now you can watch the construction live online.

Preferred Freezer Services is in the process of building a 455,000 square foot facility, of which 313,000 square feet is within the freezer with nearly 38 million cubic feet of frozen storage. All of the work inside the freezer will be performed by automated cranes to place and retrieve pallets of product. The building is 120 feet tall on a 43 acre parcel purchased from the City of Richland.

Preferred Freezer Services has a webcam tracking the project located at <http://preferred.workzonecam.com/preferred2>.

The construction company doing the work, Chill Build WA, LLC, says the work is expected to be completed in the fall of 2015. The \$69 million dollar facility will employ 75 employees immediately with 100-110 within the first year of opening.
