St. Paul Saints Celebrate Opening of CHS Field with Work Zone Cam Time-Lapse Movie

St. Paul, MN, June 25, 2015 – Baseball fans took to the stands on May 21st for the first home game of the season and official opening of the St. Paul Saints' new ballpark, CHS Field. Work Zone Cam, a popular supplier of affordable digital SLR construction cameras, is helping everyone celebrate the new addition to the Lowertown neighborhood with the release of their professional time-lapse movie showcasing construction of the ballpark.

Minneapolis-based developer and contractor, Ryan Companies, served as Design-Builder and Architect of Record for the new 7,210-seat ballpark. Based on a unique combination of high quality images, dedicated customer service and marketing support, project executives selected Work Zone Cam to document each stage of the construction process. Capturing tens of thousands of images from August 2013 to May 2015, Saints fans around the country can now watch as the vision for CHS Field comes to life.

"CHS Field is a remarkable achievement, and it wouldn't have happened without the commitment of the City, the Saints, the design-build team, and every vendor and partner that worked on this project," said Mike Ryan, Director of Architecture + Engineering for Ryan Companies. "We are very proud of this accomplishment and are excited to share it with the public."

Watch and share Work Zone Cam's time-lapse movie to see construction for the St. Paul Saints' new CHS Field from groundbreaking to opening day: <http://www.youtube.com/workzonecam>.

ABOUT WORK ZONE CAM

Founded by webcam specialists, Work Zone Cam provides a professional, reliable, and easy to use time-lapse camera solution. Work Zone Cam follows a simple approach of empowering their customers with the best Do-it-Yourself construction camera and delivering a basic, no-frills service to keep the prices low. With applications in the construction, retail, healthcare, education and design-build industries, the rugged construction camera is designed for extended outdoor use. Backed by award-winning technology that is licensed from EarthCam – the industry leader, Work Zone Cam systems are wireless, all-weather digital SLR cameras are ideal for documenting projects and producing HD quality time-lapse movies.

Some of the projects documented by Work Zone Cam include: Orlando Citrus Bowl, MNDOT roadwork, Chicago O'Hare Modernization Program, Edward Andrews Homes and The BIG Maze at the National Building Museum.
